CMPE 295B, Project Contribution Report

Project Info
Project Title: EBaaS
Project Advisor: Prof. Gokay Saldamli

Team Member 1 (self)
Name: Aditya Doshatti
Rating: 1

Contribution Description

Since the beginning of the project, Aditya always actively contributed in the discussions about topics of the projects and also for the ways of implementation to reach the solution. To be more specific he worked the most on designing the architecture of the project and comparing all possible structures and finalizing the one which we deployed.

He worked on developing the backed python APIs for talking with SQL database. Also worked on the code which edits the skeleton for generating the javascript code.Once everything was ready he worked on deployment of the application as planned into various layers and maintaing the application up and running.

He actively contributed in writing the application architecture for our final report and helped in completing the final report.

Team Member 2
Name: Darshil Kapadia
Rating: 1

Contribution Description

Darshil always took initiative in starting the process, Be it project topic selection or choosing the best approach. He had maximum contribution in generating the skeleton code which we would use for generating the code.

He worked on writing the code for APIs which were talking with our EbaaS database and also worked on the editing the code with would edit the skeleton code. He actively contributed to the front end code working with Devashish and mediated in all integration process.

He actively contributed in writing the how and why about our application for our final report and helped in completing the final report.

Team Member 3
Name: Devashish Nyati
Rating: 1

Contribution Description

Devashish always hepled us working before the deadline. Be it for submissions or preparing for the demo meeting with the advisor. To point out Devashish has his maximum contribution in the front end code and all research about how can we make EbaaS better than other available softwares.

He worked on analyzing how the user experience would be the best and which UI design would be best considering our needs and develping the front end code for the same. He also worked on the deployment with Aditya and also worked with Darshil for integration.

He actively contributed in writing about the comparison, result and analysis in the final report and helped in completing the final report.

Team Member 4
Name: Maulin Bodiwala
Rating: 1

Contribution Description

Mauling was enthusiastic about all the discussion and actively did the thinking and contributing to all the discussion and think about the corner cases which we might have missed in the discussion. More specifically he worked on the part where in including excel sheet for generating database and generating APIs for it.

He worked on the python API code for the APIs which would take user input in excel form parse through the excel sheet to generate the database and apis for it. He also actively researched about the related works and pointed out on how can we be unique and different than other softwares.

He actively contributed in writing the related works for our final report and helped in completing the final report.
